

### **Expo Chile Agrícola 2021**

*August 24 to 26, 2021*

The fourth version of the official agricultural meeting, Expo Chile Agrícola, was held for the second consecutive year in an online format.

Expo Chile Agrícola has consolidated its position as the main public-private meeting point for training and information on the main issues of interest to agriculture, with a special focus on small-scale agriculture. The Agricultural Innovation Foundation (FIA) participated in the event, promoting the strategic role that innovation plays in the national forestry and livestock sector and the associated agri-food chain.

For the international communication of these interesting talks and knowledge transfer, this seminar was supported by the services of our company MundoChile Ltda., which through its simultaneous interpreters in remote format, was a great support in technical and professional terms, thus contributing to the success of this meeting.
