

MundoChile is present at FISEG 2021 fair
International Meeting on Public and Private Security

September 28 and 29, 2021

FISEG 2021 was introduced as the major security and safety showcase in Chile and Latin America.

In its seventh version, the topic of sustainable security and prevention of critical events was approached, taking into account that without security, there can be no resilient growth.

In a hybrid modality, with face-to-face activity at CentroParque and virtual activity through the Swapcard platform, the tradeshow incorporated state-of-the-art tools with Artificial Intelligence at the service of visitors and supplier companies.

FISEG 2021 offered a comprehensive program of activities for professional visitors and training for companies, with emphasis on a complete networking for the entire security ecosystem in the country.

MundoChile had the opportunity to provide simultaneous interpretation in an in-person format again for this important encounter, ensuring a high quality service during the entire event.
