

## **Varsoviene Training**

*January 2022*

During January 2022, the renowned Chilean chocolate manufacturer Varsoviene brought to our country a technical team from Turkey, specialized in the assembly and operation of a chocolate packaging machine.

To enable the training of Varsoviene's personnel, MundoChile provided the service of a Turkish-Spanish interpreter, who accompanied them during 5 days, translating all the important and valuable content that these Turkish technicians came to share with Varsoviene's staff.

It was a successful training, with a sweet result!
